# 1947 MASTER INDEX FOR

RIDER MANUALS

# **VOLUMES I TO XV**

ALL EDITIONS

INCLUDING

THE RADIOTRON — CUNNINGHAM EDITION

AND

ABRIDGED VOLUMES I TO V

JOHN F. RIDER PUBLISHER, INC.

404 FOURTH AVENUE NEW YORK 16, N. Y.

#### PREFACE

The need for a master index covering the fifteen volumes of the "Perpetual Trouble Shooters' Manuals" has been felt for a long time to eliminate the necessity for consulting several indexes when searching for the servicing data on a particular receiver. This master index fills such a need.

Rider Manuals have been published in several different editions wherein different page-numbering systems were employed; in this master index these various pages are indicated so that no matter which edition may be at hand, data can be located by consulting just one place in this index.

In those cases where data for a particular receiver appear on consecutive pages, for example, 15-2, 15-3, 15-4, only the first page number is listed.

Model numbers beginning with a letter are listed first alphabetically, followed in numerical order by those beginning with a numeral.

In order to conserve space, it was necessary to use abbreviations, most of which are in everyday usage. In the page number column, "ARC" followed by a number indicates that the data on the record changer used with that receiver appears on that page in Rider's "Automatic Record Changers and Recorders"; used with that receiver appears on that page in Rider's "Automatic Record Changers and Recorders"; "M" stands for "Miscellaneous" pages; "C" stands for "Changes" pages; and "C. S." for "Clarified Schematics" pages.

Some of the abbreviations used to describe model numbers are listed below, followed by those for the automatic record changer pages of the various companies. For example, the Magnavox model C-101-11 uses a Webster record changer. The data for this changer start on Webster RCD. CH. PAGE 15-10 and is shown in the index as RC-WEB 15-10.
