Basic Coin Comparitor Operation

All Coin Comparitors require that a sample coin be placed in the resident coin area.

The resident coin area is the slot in the sensor coil indicated by the

“Slide To Replace Coin”

label (see photo below)

The Coin Comparitor **will not** operate properly without a resident coin.

To install the sample coin, slide this area to the right and insert your coin then carefully release. In most cases the coin will automatically seat itself. When properly seated, the coin will rest parallel between the sensor coil and the grooves in the ramp area.

If your slot machine still does not work, the following is a list of the telephone numbers for some of the major slot machine manufacturing companies who may be able to help you:

Aristocrat Technologies, Las Vegas, Nevada – 702-270-1000
Bally Gaming, Las Vegas, Nevada – 877-462-2559
IGT North America, Las Vegas, Nevada – 702-896-8500
WMS Gaming, Waukegan, Illinois – 847-785-3000
